

PATENT
10/082,745

1 5. (original) The document editing display system of claim
2 3, wherein said alphanumeric text in each of said swapped
3 segments is a sentence.

1 6. (original) The document editing display system of claim
2 3, wherein said alphanumeric text in each of said swapped
3 segments is a paragraph.

1 7. (original) The document editing display system of claim
2 3, wherein said alphanumeric text in each of said swapped
3 segments is at least one page in length.

1 8. (original) The document editing display system of claim
2 7, wherein said swapped segments further include images.

1 9. (currently amended) A method of user-interactive document
2 editing on a display comprising:
3 defining one segment of displayed data in a displayed
4 document;
5 defining another segment of displayed data in said
6 displayed document;
7 enabling a user to select to directly swap said one
8 segment with said another segment; and
9 directly swapping the positions of said segments of
10 data with each other in a single step independently of
11 separately identifying a new location for each of the one
12 and another segments other than defining each segment
13 responsive to a user selection to swap.

1 10. (original) The document editing method of claim 9
2 further including the steps of highlighting said one and
3 said another segments prior to swapping the positions of
4 said segments.

- 1 11. (original) The document editing method of claim 9,
2 wherein said displayed data in said swapped segments is
3 alphanumeric text.
- 1 12. (original) The document editing method of claim 11,
2 wherein said alphanumeric text in each of said swapped
3 segments is a phrase.
- 1 13. (original) The document editing method of claim 11,
2 wherein said alphanumeric text in each of said swapped
3 segments is a sentence.
- 1 14. (original) The document editing method of claim 11,
2 wherein said alphanumeric text in each of said swapped
3 segments is a paragraph.
- 1 15. (original) The document editing method of claim 11,
2 wherein said alphanumeric text in each of said swapped
3 segments is at least one page in length.
- 1 16. (original) The document editing method of claim 15,
2 wherein said swapped segments further include images.

PATENT
10/082,745

- 1 17. (currently amended) A computer program having program
2 code included on a computer readable medium for user-
3 interactive document editing on a computer controlled
4 display system comprising:
5 means for defining one segment of displayed data in a
6 displayed document;
7 means for defining another segment of displayed data in
8 said displayed document;
9 means enabling a user to select to directly swap said
10 one segment with said another segment; and
11 means, responsive to said user selection to directly
12 swap for directly swapping the positions of said segments of
13 data with each other in a single operation independently of
14 separately identifying a new location for each of the one
15 and another segments other than defining each segment.
- 1 18. (original) The computer program of claim 17, further
2 including means for highlighting said one and said another
3 segments prior to swapping the positions of said segments.
- 1 19. (original) The computer program of claim 18, wherein
2 said displayed data in said swapped segments is alphanumeric
3 text.
- 1 20. (original) The computer program of claim 19, wherein
2 said alphanumeric text in each of said swapped segments is a
3 phrase.
- 1 21. (original) The computer program of claim 19, wherein
2 said alphanumeric text in each of said swapped segments is a
3 sentence.
